

THE 60 FORD

Thunderbird

WORLD'S MOST WANTED CAR

THE 60 FORD

Thunderbird

ONLY CAR OF ITS *Charm* IN THE WORLD

Thunderbird—one of the all-time great automotive classics!

In every generation, there is one car that stands out, above all others, as the ultimate in glamour and excitement and prestige. That car is beyond question the new Ford Thunderbird. The classic beauty of this unique car . . . and its incomparable performance . . . make it the world's most wanted, most admired car.

You will find no counterpart for the Thunderbird on any road anywhere. No other car combines Thunderbird's com-

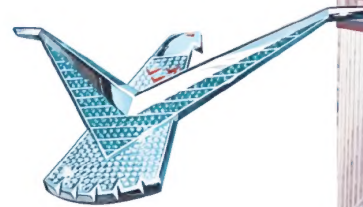

pact size, elegant comfort, and spectacular performance. No other car has Thunderbird's purity of line. And no other car, certainly, has Thunderbird's love-of-life personality.

And yet, you will find that the 1960 Thunderbird actually costs less—far less—than other luxury cars!

Thunderbird's power is legendary, of course, and with reason: the standard 300-hp Thunderbird Special V-8 engine is the whip-away wonder that has made the T-bird synonymous with performance.

And, for the connoisseur, there's a super-power option, too . . . the new 350-hp Thunderbird 430 Special V-8 . . . the biggest, finest powerplant in the industry! Both are magnificent engines, eager to perform for you. With this kind of power in a car of Thunderbird's size, you get handling agility and roadability that add up to Thunderbird performance. And, as the whole world knows, Thunderbird performance is performance without peer.

Thunderbird—the car *everyone* would love to own!

Thunderbird's smartness and individuality make it the choice of people who have unlimited choice. It has influenced many people who formerly drove big luxury cars to forget their past loyalties. They are now proud owners of Thunderbirds, the new standard of luxury and fine taste in automobiles.

THE 1960 THUNDERBIRD HARDTOP . . . its classic beauty, unmatched luxury and superlative performance have made it an historic success

© 1959, Ford Motor Co., Dearborn, Mich.

THE BRILLIANT NEW *Thunderbird* HARDTOP

EVERY LINE IS A LINE OF *Distinction*

Just say "Thunderbird"!

The very name evokes an image of glamour and spirit and distinction. This beautiful car comes by its beauty *naturally*. You won't find another car with lines so clean. So unaffected. So smart. From the safety-minded new triple taillights to the imposing new grille every line is diamond-true. The reason is Thunderbird's *great basic design*. This design is why Thunderbird—alone among the world's luxury cars—gives you sports car roadability and luxury car comfort. And this is why the Thunderbird can look as exciting as a racer and, at the same time, seat four people so elegantly that each one has the spacious, deep-down comfort found in a limousine. A unique achievement. A unique car!

Thunderbird's Panel Console is an exclusive feature. It is an extension of the instrument panel, and runs fore and aft between the seats. Attractive and functional, it houses radio speaker and air conditioner controls. It positions ash trays and power window controls within easy reach of driver and all passengers.

THE DAZZLING NEW *Thunderbird* CONVERTIBLE

UNIQUE IN ALL THE WORLD FOR DRAMA AND *Excitement*

Fully automatic, the top disappears completely!

Without getting out of the car or leaving the driver's seat . . . you just touch the control—and behold! The power-operated, fully retractable top vanishes in seconds into the spacious trunk. To all appearances, this brilliant convertible *has* no top—not even a hint of a top—nothing to interrupt the long, clean sweep of Thunderbird beauty. There's just you and the sun and fun—more fun than you ever dreamed driving could be!

Actually, of course, the sleek Thunderbird convertible has a luxurious top. You have a choice of soft tops featuring a middle layer of latex . . . a 4-ply satin-grain vinyl top . . . or a 3-ply rayon fabric top . . . for an exceptionally pleasing appearance. All are outstandingly durable. All are made of leakproof material and easily cleaned. All are further proof that the Ford Thunderbird's tops are the best tops in the world of convertibles. Top up or top down, the new Thunderbird convertible is the happiest, sunniest, smartest way to get from one place to another!

1 Just pull out the top control switch and the 1960 Thunderbird's rear deck *ribs* automatically. 2 Like magic, the new Thunderbird's soft top retracts and *folds itself* into the spacious luggage compartment. 3 Now, with the top retracted and concealed, the rear deck lid closes itself. The lid is completely flat. All you see is a dazzling expanse of beautifully sculptured deck. You're driving the only convertible of its kind in the world!

Dashing AS A SPORTS CAR...

Inside and out, the 1960 Thunderbird has a pulse-quickening sports car personality. With its compact body, it looks as swift and fiery as any Sebring sprinter. The imposing instrument panel of ribbed die casting in gleaming satin chrome enhances the T-bird's sports car character. *And you get all this as standard equipment:* thick-padded Lifeguard safety instrument panel, fully cushioned Lifeguard sun visors and deep-center Lifeguard steering wheel. Self-regulating electric clock. Day-night type rearview mirror. Handsome Thunderbird front fender ornaments. Individually adjustable driver's seat and front passenger seat.

The new Thunderbird luggage compartment is 5 feet, 5 inches wide—more than 20 cubic feet of space! Pack 4 big suitcases, golf bags, and plenty of other bulk—and still have room to spare! Note that the spare tire stows in front of the compartment—one reason why you have so much room.

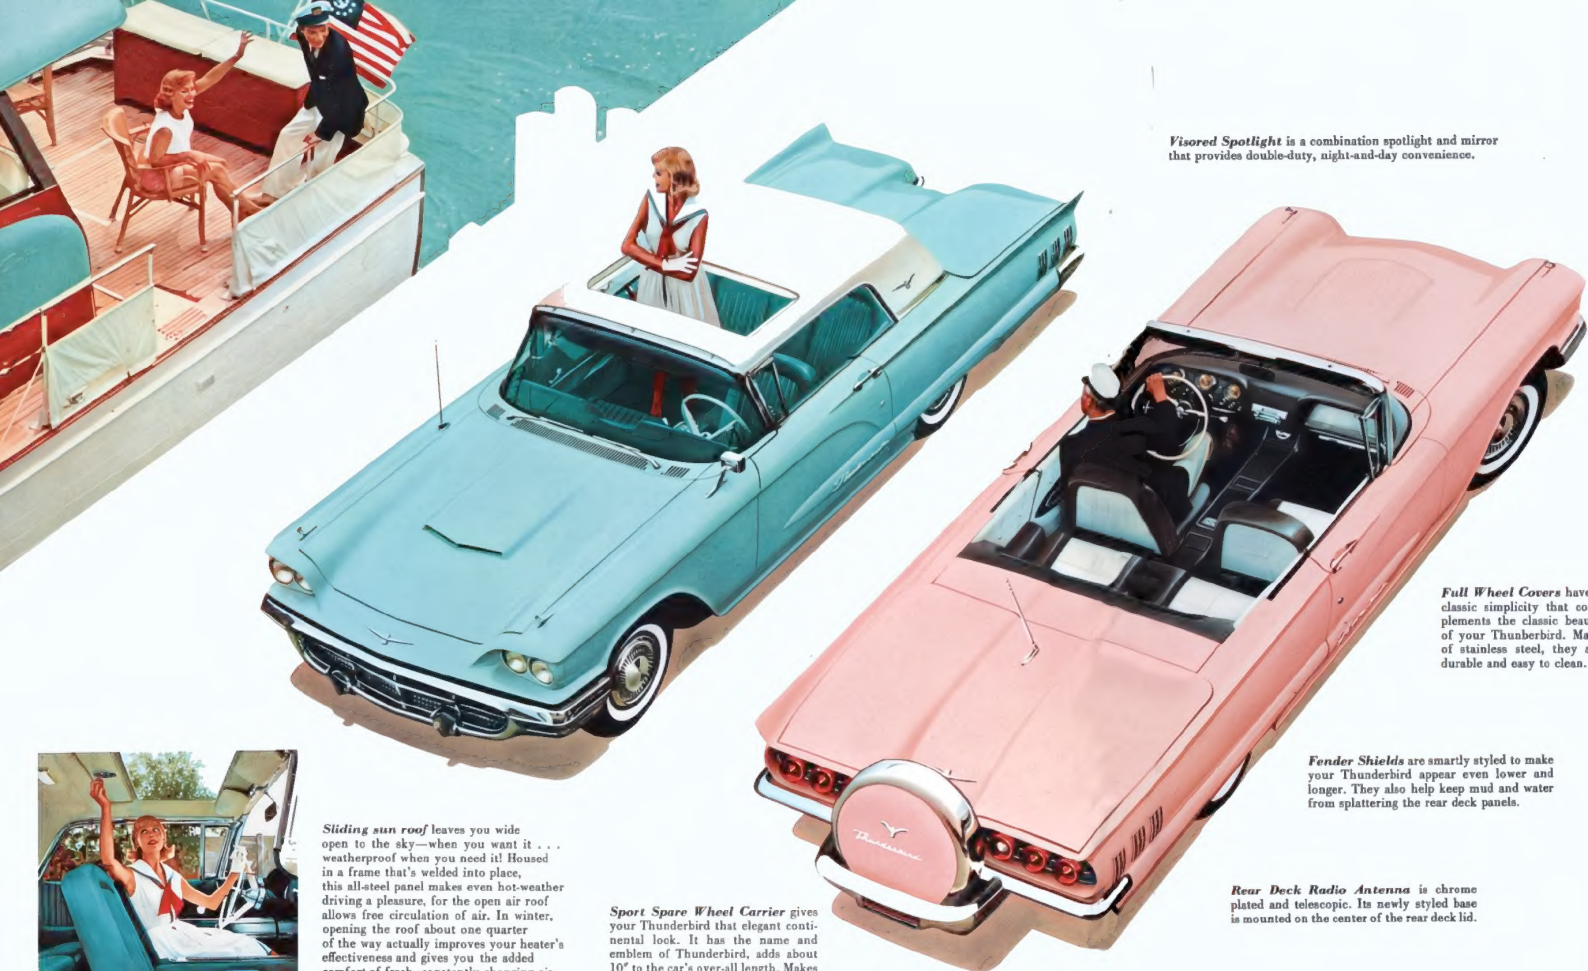

Comfortable AS A LIMOUSINE!

Riding in the 1960 Thunderbird, you can only marvel at its brilliant design. It's so beautifully compact, yet here is limousine room . . . limousine comfort . . . limousine luxury. Through Thunderbird's extra-wide and welcoming doors you slip easily into *individual* seats, individually contoured. Each is as wide and deep and soft as any seat you have in your own home. And inside the Thunderbird, *restrained elegance is the keynote*. Moreover, this year you have a choice of no less than *fifteen* interior color combinations featuring rich morocco grain vinyl . . . nylon cord (at right) . . . and pleated genuine leather (above) if you prefer.

Luxurious, individually adjustable seats for the driver and front passenger . . . elegantly soft, individually contoured seats for the rear passengers . . . and the plush comfort of formed foam rubber in the cushions and backs of all the seats—yours exclusively in the 1960 Thunderbird.

Visored Spotlight is a combination spotlight and mirror that provides double-duty, night-and-day convenience.

Full Wheel Covers have a classic simplicity that complements the classic beauty of your Thunderbird. Made of stainless steel, they are durable and easy to clean.

Fender Shields are smartly styled to make your Thunderbird appear even lower and longer. They also help keep mud and water from splattering the rear deck panels.

Rear Deck Radio Antenna is chrome plated and telescopic. Its newly styled base is mounted on the center of the rear deck lid.

Backup Lights—inboard in the cluster of three—provide easier, safer backing up at night... automatically flood the area behind the car with twin beams of light when the transmission is put in reverse.

Sport Spare Wheel Carrier gives your Thunderbird that elegant continental look. It has the name and emblem of Thunderbird, adds about 10" to the car's over-all length. Makes extra trunk space, too.

Sliding sun roof leaves you wide open to the sky—when you want it... weatherproof when you need it! Housed in a frame that's welded into place, this all-steel panel makes even hot-weather driving a pleasure, for the open air roof allows free circulation of air. In winter, opening the roof about one quarter of the way actually improves your heater's effectiveness and gives you the added comfort of fresh, constantly changing air. The sun roof gives you all the advantages of a closed car *plus* the "open air" feel of a convertible. It's smart, distinctive and convenient, too.

TO ADD AN EXTRA MEASURE OF *Comfort AND Pleasure* *Thunderbird Options and Accessories*

NEW MASTER-GUIDE POWER STEERING

Does up to 85% of the work for you! Makes your T-bird a pleasure to steer, to park, and a snap to handle, even in tight cornering or a neat U-turn. You retain full feel of the road for safer, surer driving.

SELECTAIRE CONDITIONER

Brings you June in January and vice versa. It cools delightfully in summer, heats comfortably in winter—just flick the dual lever control. The complete unit is entirely out of sight, out of the way, ahead of the passenger compartment.

SWIFT SURE POWER BRAKES

Not even a Thunderbird can be on the wing all the time. Easy, safe way to stop is with Swift Sure power brakes. They take up to 45% less effort—make your driving that much more relaxing!

POWER-LIFT WINDOWS

All are centrally controlled from Thunderbird's exclusive panel console. Here is a four-button master control that electrically operates the side windows, within easy reach of everyone in the car!

THUNDERBIRD POWER SEAT

Like to sit way back? Close to the wheel? Higher or lower? Touch a button and Thunderbird's infinite-position power driver's seat with synchronized tilting back goes up, down, back or forward!

CENTRAL CONSOLE RADIO

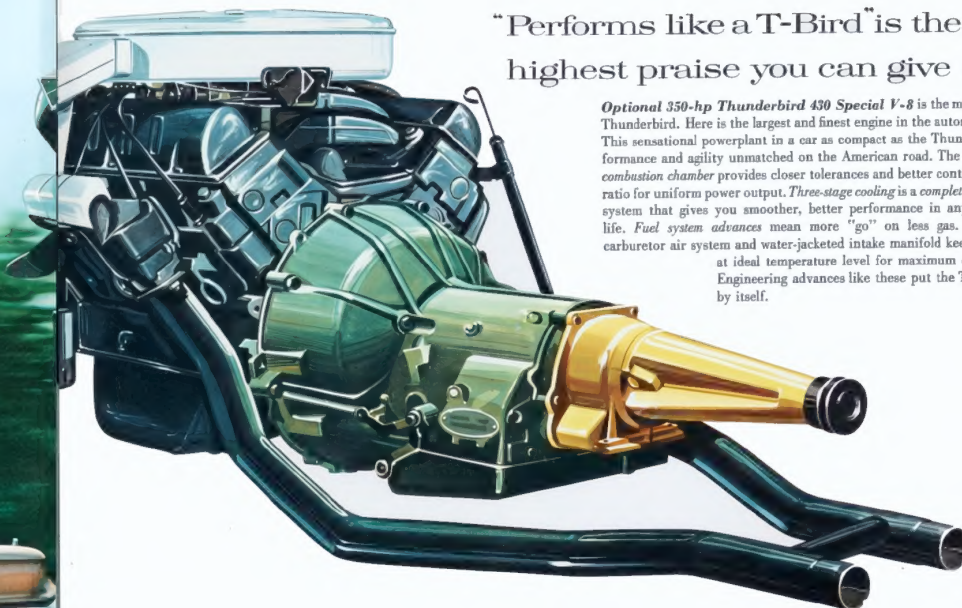

Has dual-transistorized power output for outstanding tonal quality. Superior type of speaker, with an inverted magnet, is located in console for best reception by all passengers.

Thunderbird owners are perfectionists. They have, in their T-birds, America's most admired car and most spectacular performer. And to heighten even these pleasures, they may choose the optional Thunderbird power assists and accessories pictured here.

These accessories are noteworthy for the fact that they are beautifully *functional*. They are practical. Each one contributes measurably to the satisfactions of driving a Thunderbird. Each one adds a brilliant personal touch and greater luxury to the car *everyone* would love to own.

CLEAR PLASTIC SEAT COVERS • TWIN FLOOR MATS
LUGGAGE AND GLOVE BOX LIGHTS
I-REST TINTED SAFETY GLASS

"Performs like a T-Bird" is the highest praise you can give any car!

Optional 350-hp Thunderbird 430 Special V-8 is the mighty heart of the 1960 Thunderbird. Here is the largest and finest engine in the automotive industry today. This sensational powerplant in a car as compact as the Thunderbird results in performance and agility unmatched on the American road. The revolutionary *in-block combustion chamber* provides closer tolerances and better control of the compression ratio for uniform power output. *Three-stage cooling* is a completely controlled pressure system that gives you smoother, better performance in any weather and longer life. *Fuel system advances* mean more "go" on less gas. Exclusive pre-heated carburetor air system and water-jacketed intake manifold keep the fuel-air mixture at ideal temperature level for maximum combustion efficiency. Engineering advances like these put the Thunderbird in a class by itself.

Choose from
3 great
transmissions

Cruise-O-Matic Drive, illustrated above, (optional with either the 350-hp engine or the 300-hp engine) gives you the right GO for every driving range! "D" position lets you start in low for lively, full-power getaways—then move smoothly, automatically right up to

superhighway speeds. A "D" setting lets you start in intermediate for sure-footed acceleration on ice or gravel. You can move into "L" position for effective engine braking at any driving speed. And with a gas-saving rear axle ratio, you get "built-in" overdrive economy.

Overdrive (for 300-hp engine only) saves gas while it saves your engine, especially on long trips. It is a combination of standard 3-speed transmission and an automatic fourth gear, allowing the engine to loaf while the car is traveling at higher touring speeds.

3-Speed Conventional Drive (for 300-hp engine only) gives you the easiest, smoothest, quietest manual shifting ever developed. Shift lever shaft is enclosed in steering column. Gear ratios are tailored for Thunderbird-smooth performance, economy and responsiveness.

YOU CAN'T KNOW WHAT *Performance* IS UNTIL YOU DRIVE A *Thunderbird*

Because no other car combines Thunderbird's compact size with Thunderbird's mighty power

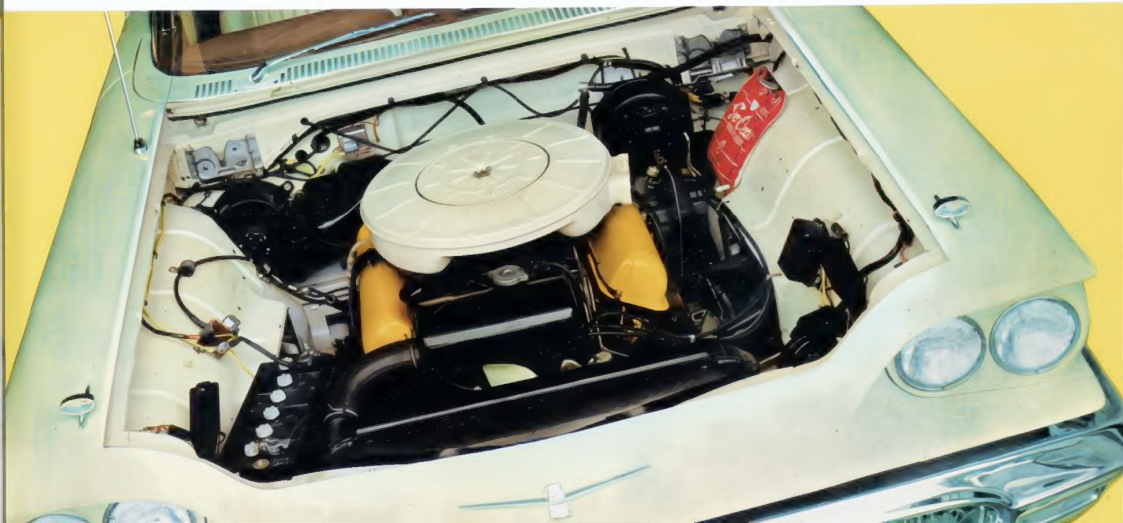

You may have been driving for twenty or thirty years . . . you may have covered half a million miles or more . . . but until you take the wheel of the 1960 Thunderbird, you just can't know what *real* performance is. For only in this unique car do you get the combination of Thunderbird's marvelous compactness and famous power.

Two great engines make the name "Thunderbird" and "magnificent performance" mean one and the same thing: the highly responsive standard 300-hp Thunderbird 352 Special V-8 and the even more impressive optional 350-hp Thunderbird 430 Special V-8. Both give you the split-second surge of power and the intuitive eagerness that

even the sportiest sports car might well envy. And, it goes without saying, Thunderbird's ease of handling, cornering, climbing, parking—every aspect of T-bird performance—is simply spectacular.

Significant, too, is the fact that the 1960 Thunderbird delivers power *where it counts*—for extra-safe passing in normal speed ranges. All this while Thunderbird's automatic ride control smooths out even the roughest roads in a way you must experience to believe.

Standard 300-hp Thunderbird 352 Special V-8 with 4-barrel carburetor is the triumphant achievement of Ford—the world's most experienced builders of V-8's. It features Precision Fuel Induction—a remarkable direct fuel-feeding, gas-saving system . . . new 2-phase Full-Flow oil filtration . . . free-turning aluminized valves with hydraulic lifters . . . an engine electronically balanced under its own power for optimum smoothness. These and many other advances add significance to famous Thunderbird GO!

NOBODY LOVES THE *Thunderbird* MORE THAN THE PEOPLE WHO *Drive* IT!

Pride of ownership is one characteristic that all Thunderbird people share. An elite group among motorists, they *know* that theirs is the smartest car on the American road. They speak with unabashed joy and affection when they speak of their T-birds. Here you can read what some distinguished owners say about their cars.

Wouldn't you like to experience personally the thrill and satisfactions of driving this unique car? Your Ford Dealer will be delighted to arrange it for you.

Miss ANNE COLE, Beverly Hills, California
"Now that I've discovered the Thunderbird, I wouldn't want any other kind of car," declares the youthful Vice-President of Cole of California. "I've already crossed the country twice in my T-bird convertible!"

MR. AND MRS. J. B. SANFORD, JR., New Orleans, La.
"Ever since we got our Thunderbird," says this prominent investment banker, "our other car has had it pretty easy. We appreciate the Thunderbird's beauty and comfort. It's a fine investment in pleasure!"

MR. AND MRS. JAMES T. BERRYMAN, Washington, D. C.
This Pulitzer Prize-winning cartoonist calls his Thunderbird "a dream car . . . and a beautiful road car." Mrs. Berryman agrees. She uses it in her work as Deputy Director of Red Cross Volunteers in 16 states.

MR. DANIEL R. TOPPING, New York, New York
"I have always owned larger cars," says Mr. Daniel R. Topping of New York, well-known sportsman and co-owner of the New York Yankees, "but from now on it's Thunderbird."

MR. AND MRS. H. S. TUCKERMAN, Pride's Crossing, Mass.
"I don't think you can compare a Thunderbird with other cars. It's in a class by itself," says the well-known Boston executive. "Now that we drive a T-bird, we'd never go back to the big luxury cars!"

*Also in reverse color combination

SPECIFICATIONS

Engines: 300-hp Thunderbird 352 Special V-8 (standard)—352-cu. in. displ., 4.30" bore x 3.50" stroke; 7.8 to 1 comp. ratio; premium fuel; 4-barrel carburetor, dual exhausts, aluminum mufflers. Features Precision Fuel Induction with wedge-type combustion chambers for superior performance and economy. Super-Filter air cleaner, Full-Flow oil filtration, automatic choke, free-turning overhead aluminum valves with hydraulic valve lifters. Cross-Flow cooling system and 160° thermostat. Engine electronically balanced under its own power for optimum smoothness.

350-hp Thunderbird 430 Special V-8 (optional)—430-cu. in. displ., 4.30" bore x 3.70" stroke; 10.0 to 1 comp. ratio; premium fuel; 4-barrel carburetor, dual exhausts, aluminum mufflers. Features precision carburetor air induction system with Super-Filter air cleaner, water-jacketed direct-line intake manifold and in-block wedge-type combustion chambers with machined flat heads and step-top pistons for exceptional performance and economy. Three-stage pressurized cooling system with 140° and 160° thermostats, Full-Flow oil filtration, automatic choke, free-turning overhead aluminum valves with hydraulic valve lifters. Engine electronically balanced while operating under its own power for optimum smoothness.

Construction: Welded, integral body and frame, for greater durability and quietness with high strength-weight ratio.

Suspension: Smooth-acting Sweep-Back, Angle-Folled Ball-Joint front with coil springs and sports-car stabilizer to control roll on turns. Even-Keel asymmetrical rear leaf springs provide soft-ride, variable rate with rubber-bushed supports, rubber insulation at axle and tension-type shock absorbers for anti-dive and anti-squat control on braking and acceleration. Double-acting shock absorbers.

Brakes: Double-acting self-energizing hydraulic design, with suspended pedal and dash-mounted master cylinder. 11" disc composite drums with cooling grooves for fade resistance. 208-in. lin. lining area.

Transmissions: 3-Speed Conventional Drive or optional Over-drive with automatic 4th gear (with 352 Special V-8); or optional Cruise-O-Matic Drive with two selective drive ranges (with 352 Special V-8 or 430 Special V-8).

Drives: Deep-Flat hypoid rear axle with axle-mounted shock absorber. Hotchkiss drive. Axle ratios to 1:3.70 with 3-Speed Conventional Drive or Overdrive. 3.10 with Cruise-O-Matic Drive for 352 Special V-8; 2.91 with Cruise-O-Matic Drive only for 430 Special V-8.

Steering: Smooth, free-rolling recirculating-ball type gear; 25 to 1 over-all ratio. Turning diameter 40 feet.

Tires: 4-ply block tubeless of Tyrex super cord, 8.00 x 14, on 5 1/2" safety rims. Optional: whitewall tires in 8.00 x 14 or 8.50 x 14 size.

Dimensions: 113" w.b., 60" front, 57" rear track; 205 1/2" over-all length; height, with design load 32 1/2" (hardtop), 53 1/2" (convertible). Curb weight 3971 lb. (hardtop), 4061 lb. (convertible).

Standard Equipment: Life-guard padded instrument panel, cushioned sun visors, Double-Grip door locks, safety-survival day-night type inside rear-view mirror and deep-center steering wheel with horn ring. Manually adjustable individual front seats, electric clock, automatic dome light, hardtop and courtesy light in convertible, cigarette lighter, coat hooks in rear compartment, Thunderbird front fender ornaments, dual horns, turn signals, vacuum-booster pump for more constant windshield-wiper action.

Options and Accessories: Sliding roof panel. Sport spare wheel carrier. Power driver's seat, power windows, power brakes, power steering. Radio, optional. Music-Aire heater. Select-Aire conditioner (requires 8.50 tires with 430 V-8 engine). Seat belts. 1-8 tinted glass. Automatic windshield wiper. Outside mirrors, viewed spotlight mirror, fender shields, backup lights, glove box and luggage lights, Sun Ray wheel covers. Locking gas cap.

Prices: Some items illustrated or referred to are at extra cost. For the price of the Thunderbird with the equipment you desire, see your Ford Dealer.

The specifications were in effect at the time this catalog was approved for printing. The Ford Division of Ford Motor Company reserves the right to discontinue models at any time, or change specifications or design, without notice and without incurring obligation.

NEW Thunderbird Colors

TASTEFUL AS THE CAR ITSELF!

Nineteen rich Single Colors for the 1960 Thunderbird exterior . . . 15 harmonizing interior trims . . . 3 distinctive convertible top colors . . . and no less than 56 Two Tone hardtop combinations! This is the beautiful, luxurious choice of color that the new Thunderbird offers you. And each color is in new Diamond Lustre Finish . . . the bright-

est gloss, hardest finish ever developed for any automobile. It's so durable you won't have to wax it—ever! Your 1960 Thunderbird will keep its jewel-like sparkle!

As you study these pages, you will agree, we believe, colors of such subtle beauty and taste could only belong to that jewel of a car—the brilliant 1960 Thunderbird!

15 LUXURY LOUNGE INTERIORS

The new Thunderbird offers you an almost limitless choice! And each one, of course, is in harmony with Thunderbird's beautiful exterior finish.

The top portion (see symbols) shows the color of the bolster—now available in 4 genuine leathers and 6 rich morocco grain vinyls. The lower portion shows the back and cushion inserts—available in 4 plated leathers, 5 nylon cord fabrics and 6 morocco grain vinyls in an elegant button-tufted design.

The convertible offers you the best in weatherproof soft tops—two in soil-resistant, satin-grained vinyl and one in fade-resistant rayon.

- ① White vinyl-clad with black lining
- ② Black rayon with black lining
- ③ Light blue vinyl-clad with black lining

These numbers as well as the color symbols correspond to those identified in the upholstery chart. In this way all exterior and interior colors are harmoniously color-keyed.
